

Powdered Defoamer

Eliminates Foam in the Cleaning Process

Description:

Powdered Defoamer eliminates troublesome foaming from detergent residues left in carpet. For use with portable or truck mount extraction cleaning machines. Prevents foam from developing throughout the entire system — Prevents foam from developing right at the carpet, not just in the hose or recovery tank. Keeps on working to prevent foam in the entire wand, hose and vacuum tank.

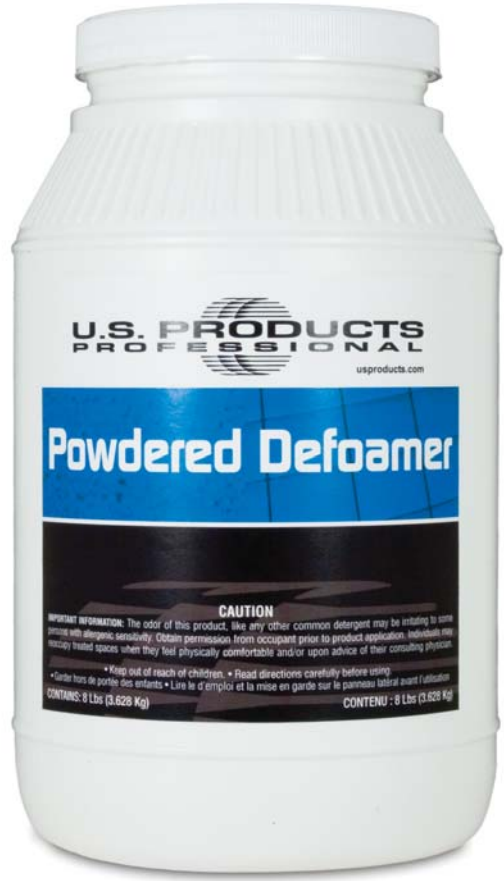

Completely soluble — The powdered carrying agents in Powdered Defoamer dissolve completely when wetted by detergent solution or water. This allows the complete product to be extracted, leaving no defoamer residue.

Odorless — Powdered Defoamer creates no odor in use and leaves no “after odor” in the carpet. Your carpet cleaning keeps the clean fragrance you and your customers expect.

Saves time and labor — One application of Powdered Defoamer over the carpet defoams the entire job. No periodic stopping to renew defoaming properties. No removal of hose from wand. No extra mess to clean up from a leaky spray bottle. No possible spotting.

Directions:

Easy to use — Before extraction cleaning, lightly and evenly apply Powdered Defoamer directly to carpet. Generally, only a few tablespoons of Powdered Defoamer per 100 square feet of carpet are required to completely prevent foaming. If carpet contains an extra heavy detergent residue from previous cleanings, increase the quantity of Powdered Defoamer used.

Product Specifications:

Ingredients:

Sodium Chloride (CAS 7647-14-5), Sodium Sulfate (CAS 7757-82-6), Dimethyl Silicone (CAS 63148-62-9).

- PH:** 5.5 - 6.5 PH (1% solution)
- Coverage:** Up to 3,000 sq. ft. per lb.
- Fragrance:** Low
- Appearance:** White crystalline powder
