

# EVOLUTION

*Half the Weight, Twice The Performance*

U.S. Products takes wand design to the next level with the Evolution. This rotationally molded carpet wand is light, durable, and more efficient than any other wand on the market today! Through scientific testing, the Evolution was designed to smooth airflow and boost water recovery performance. U.S. Products tested the Evolution against many other carpet wands available on the market and found it left 1/2 of the residual moisture per square yard as the best carpet wand in the test group and left only 1/4 of the residual moisture per square yard as the worst performing carpet wand in the test group. Rotationally molded head and aircraft aluminum tube make the Evolution nearly twice as light as most wands available. Replaceable air tight Delrin® acetal glide and ergonomic design give the operator effortless glide across any type of carpet.

The superior performance is most notable when our portable carpet extractors were retested at the Carpet and Rug Institute (CRI) using the Evolution. All of our heated portable extractors of 300 psi and above went from a bronze to a GOLD rating just by using the Evolution! U.S. Products is the first and only manufacturer to achieve the GOLD rating from CRI for portable carpet extractors.

Patents Pending

## SPECIFICATIONS:

<b>Weight</b>	6.5 lbs
<b>Head</b>	Rotationally molded LLDPE
<b>Glide Receiver</b>	6061 T6 aircraft aluminum
<b>Glide</b>	Delrin® acetal - removable/replaceable
<b>Vacuum Tube</b>	Powder coated 6061 T6 aircraft aluminum
<b>Jets</b>	(2) 110 degree #1 tips, .026 (.8 gpm at 500 PSI)
<b>Solution Line</b>	3000 PSI high pressure hose with stainless steel end fittings
